TBICO is a Northstar Digital Literacy Center

The Northstar Digital Literacy Assessments, offered through TBICO, are aimed at helping adults acquire the basic skills they need in today's workplace. The lessons are simple and easy to understand and navigate; each assessment moves the learner up a level in their digital literacy skills.

Northstar Digital Literacy Assessments and self-guided tutorials cover essential computer and Internet skills, essential software skills, and using technology to accomplish tasks. Northstar is especially helpful for job seekers who may lack the digital literacy skills needed to seek, obtain, and retain employment, as well as to perform other tasks in daily life.

Earning a Northstar certification confirms that you have the digital skills to compete in today's job market.

Northstar Certificates provide an important credential for employment, as even entry-level jobs increasingly require basic computer skills. If individuals do not pass, personalized assessment results provide a roadmap to relevant instruction, allowing them to retake the assessment once they have mastered the necessary skills.

Testing for a certificate is optional but highly recommended as these certificates attest to your skills and can enhance your resume, LinkedIn profile, and more.

TBICO now offering Northstar Online Learning!

Northstar Online Learning (NSOL) provides a set of tutorials for independent study. Each module consists of online lessons with clear, slowly-spoken audio coupled with written words, to accommodate a variety of learning styles and levels.

The online lessons include instruction followed by a task, prompting learners to perform the skill just learned. At the end of each segment, a quiz is given to show mastery, before moving on to the next segment.

At the end of the entire module, a quiz is given to determine if the learner is ready to take the assessment or spend more time studying.

Currently, the four online tutorial modules available in NSOL are: Basic Computer Skills, Internet Basics, Email Basics, and MS Word 2016.
